Professional Summary

Data Analyst with 1 year of experience in reporting, business intelligence, and dashboard development. Skilled in SQL, Python, Power BI, Tableau, Excel, DAX, Power Query, and data modeling. Experienced in analyzing large datasets, performing data validation, developing KPI dashboards, and generating actionable business insights. Strong analytical and problem-solving skills with expertise in business intelligence, reporting automation, data visualization, and stakeholder reporting.

Work Experience

Data Analyst ICICI Bank, Pune

Project: Trade Finance Global Reporting

- Analyzed daily Trade Finance transaction data across 7 international locations, ensuring reporting accuracy and data consistency.
- Performed data validation, reconciliation, and quality checks using SQL and Excel, improving financial data reliability.
- Developed and maintained MIS reports, business reports, and KPI dashboards to support operational decision-making and performance monitoring.
- Automated recurring reporting processes using Pivot Tables, XLOOKUP, and advanced Excel formulas, reducing manual effort and improving efficiency.
- Collaborated with stakeholders and cross-functional teams to gather reporting requirements and deliver accurate analytical insights.

Projects

Super Store Sales Dashboard — Power BI

Feb 2026

- Built an interactive Sales Performance Dashboard tracking \$1.57M revenue and 11.2% profit margin across 4 regions.
- Designed and developed interactive KPI dashboards using Power BI to support business performance monitoring and decision-making.
- Created advanced DAX measures for Profit %, YoY growth analysis, and KPI monitoring.
- Implemented slicer-based filtering and segmentation analysis across 3 customer segments.
- Delivered executive-ready reporting with clear visual hierarchy and actionable business insights.

Tech Stack: Power BI, DAX, Power Query, Excel

NYC Taxi Business Intelligence Dashboard

Jul 2025 – Aug 2025

- Analyzed 10M+ NYC taxi trip records to identify fare patterns, peak-hour demand, and key revenue drivers.
- Processed and transformed large-scale datasets using Hadoop and PySpark to enable scalable analysis.
- Performed data preparation and transformation to support reporting and visualization requirements.
- Conducted exploratory data analysis (EDA) to uncover factors influencing fare variation, including trip distance, pickup location, and time-based trends.
- Designed and developed interactive Tableau dashboards to monitor KPIs, revenue trends, demand fluctuations, and business performance metrics.
- Generated actionable pricing and demand insights to support business decision-making and operational planning.

Tech Stack: Python, PySpark, Hadoop, SQL, Tableau
